Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

As the aircraft reached the ground in the autorotative decent under only partial engine power, the helicopter landing gear dug into the soft dirt of the empty field and rocked forward and then backward causing the main rotor blade to strike the tail boom. This caused the tail boom to sever from the fuselage of the aircraft.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

On Tuesday, 04-16-2019, at approx.. 0730 hours, Omaha Police Officers/Pilots Hill, Dustin [REDACTED] and BAUGHMAN, Matt [REDACTED] were both on duty as crew members of ABLE-1 (Omaha Police Helicopter - N109PD). Officer Hill was the Pilot in Command (PIC - right seat) of the aircraft and Officer BAUGHMAN was the flight observer (left seat). Officers took off from the Omaha Police Department hangar located at the North Omaha Airport (K3N0) along taxi way 35 with the intended destination of the Blair airport (KBTA). The intention of the flight was to fiery the helicopter to the Blair airport for pilot training scheduled that day at the Blair airport.

Upon ascending through approx. 200-250 ft. above ground level (AGL) and making a left turn to the west in the direction of the Blair Airport, the pilots recognized an audible horn and low rotor RPM in the cockpit and loss of altitude indicating a loss of rotor RPM and loss of engine power. Based on his experience and training, the PIC (Hill) lowered the collective flight control and entered an autorotation in an effort to regain rotor RPM. During this time, R/O and Ofcr BAUGHMAN began diagnosing the emergency while acquiring the best suitable landing area for the aircraft. Ofcr BAUGHMAN was verbally advising the PIC to the status of the flight instruments and continually assessing the engine gauges. Only seconds later, the pilots arrived at the best suitable landing area in a field just north and west of the North Omaha Airport. As the aircraft reached the ground in the autorotative decent under only partial engine power, the helicopter landing gear dug into the soft dirt of the empty field and rocked forward and then backward causing the main rotor blade to strike the tail boom. This caused the tail boom to sever from the fuselage of the aircraft. The PIC then shut down the helicopter, waited for the engine to stop then exited the aircraft.
