I was sitting by our back window and heard a crash. I looked up & something went through the shed and then there was an explosion. I ran outside and saw that a small plane had crashed through - into the house next door. I checked the passengers, the young girl was bleeding and struggling breathing. She didn't respond to me. The older passenger was not able to move but talking.

On 23rd of May, I, Chris Bourland was traveling east-bound on Virginia Parkway. During my travel, I observed a plane taking off from the airport. It got about 80 to 100 ft high and was failing to gain altitude. It started to bank right and short of the end of the Runway. The Pilot appeared to be trying to circle around and the plane started making a wave pattern and went down. I circled around to go find the plane to try to render aid. At this time Police were dispatched along with Ems on the scene. Mechanics were on site from behind and South of Point of Impact.
