NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

Departed Oshkosh Rwy 18 (KOSH) approximately 8:00 am July 26, 2019 headed to St. James (KJYG). Diverted to Rochester INYL (KRST) to refuel because of extreme headwinds west of Oshkosh. Checked the weather in my direction of flight on Foreflight and ADSB weather and the condition of KMHE for landing. Departed KRST approx 10:45-11:00 am destination Mitchell, SD (KMHE) to refuel. Was with Approach control until the end of their boundary. I told them I intended to fly at 4500' because of headwinds and they said they could not give me traffic advisories below 5500'. Intended to continue on to Casper, Wyoming after refueling Mitchell. Approximately 30 miles east of Mitchell picked up the ASOS which stated wind calm at KMHE, no clouds. 15 miles out ASOS reported wind variable 0-3 kts. Wind at 4500' was 11kts 180-210 degrees. Decided to land 18 assuming if any wind at all it was possible within 30 degrees of 180. Checked the ASOS again approximately 5 miles out. Announced entering the airport area and entered left downwind for runway 18 on the 45 degree angle at 2300'. Flew a standard pattern self announcing on Unicom. On final an RV announced they would be taxiing but would wait for me to land. Turned final-no wind affecting the airplane. Flew the centerline and made a gradual descent, approx 56 kts over the number. Immediately upon touching down the plane veered hard right. Immediately applied left rudder to prevent a ground loop. Could not get the plane turned to the left and gave full throttle and attempted a go around. Plane left the runway into the grass. The plane hit a grass berm and bounced into the air and came down in the field.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I don't think some level of accident could have been prevented.
