NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

While performing a Part 137 spraying operation, I entered the target field on a northbound heading. At approximately 100-120ft AGL the low rotor rpm audio sounded. As I attempted a recovery, the rotor rpm continued to decay rapidly. I then used the remaining rotor rpm to level the aircraft and cushion the landing. As the aircraft made ground contact it slid approximately 150-200ft before the landing gear dug into soft dirt and caused the aircraft roll over forward and the rotor blades contacted the ground.
