Date of accident: 08/05/2019

Time: 1340Z / 9:40 AM

PIC: Daniel Vaca

In the aircraft were 3 people, Catalina that is my student, Marcelo that is her boyfriend and me as a flight instructor. We preflight the aircraft, add some oil, check the fuel that was about 30-40 gallons. Then we went inside of the aircraft and followed the checklist we turned on the aircraft, was a normal starting. We copied the ATIS, was winds calm, runways 27R/27L were in use. After that, we contacted clearance, ground and we taxi via alpha for runway 27R. We did the run up following the checklist. All the indications was normal, magnetos dropped about 50rpm each one, carburetor 50rpm, fuel pump was on. All gauge green, Oil pressure, Oil Temperature, Fuel pressure. We called ground and monitor tower. Tower gave us clearance for takeoff and she did the take off that was a normal takeoff no flaps and she rotated about 75 kts. At 150-200 ft the RPMs start to dropped about 200-300 RPM like a partial loss of power. I said my flight controls and I took the controls. I checked really fast all the switches if were on and if the throttle was full and everything were good. I decided to keep climbing at 70-75 kts that is the best glide speed. I advised tower that I was going to land on 9R that is the parallel runway at Tamiami. I did not go to RWY 13 because the turn would have been really steep and dangerous. On the turn I lost completely the RPMs and I decided to do a force landing into a corn field between RWY 9R and RWY 9L. At the same time I was communicating with tower, let them know that I was not going to arrive to the RWY 9R. After the landing, first I checked myself if I had any injury, then I looked Marcelo who had an injury on his forehead. Finally, I looked Catalina who had her nose broken. I contacted tower and let them know that we were in a corn filed between RWYs and that we need immediately medical assistance, specially for Catalina that was bleeding. Then I turned off all the switches and the magnetos and I told Catalina and Marcelo that we need to evacuate. So, I opened the door and we went out waiting for fire rescue, I will say that they arrived in about 3 minutes, meanwhile Catalina had a panic attack and she started to lost her conscious. I yelled her saying that she needs to be awake. Fire rescue arrived and took care of them and carried to hospital. The airport manager took me to the airport office and I waited for FAA.
