Date of accident : 08/05/2019

Time : 09:48 am

Passenger : Marcelo Pacheco Beza

I was at the spot 4 with Catalina Cortez and her instructor Daniel Vaca, I saw them making the preflight inspection, they added 1/4 of oil. We went inside the aircraft they listened the ATIS and followed the checklist. that day the active runway was 27R and 27L, We taxi via Alpha to runway 27R, they made the run up, checked engine instruments all was in green, they checked the magnetos, the drop was about 50 each magneeto, then they contact tower and departed from 27R. She rotated at 75 Knots and at 200 FT the RPMs start to dropped about 200-300 RPMs. Immediately he took the controls and tried to land on the parallel runway that is 9R, but when he started the turn, We lost completely the RPMs. Was a forced landing between 9R and 9L in a corn field. After the crash, I checked myself, and my nose, ~~my~~ forehead and gum were bleeding. I went outside the airplane with Catalina while the instructor was talking on the phone asking for some help. Finally the fire rescue took Catalina and me to the hospital.
