Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Knock the engine off the front of aircraft the controls panels came off front land gear came off four the tail off the airplane. Pilot seat broke loose from frame.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Woke up about 5:15am check for-flight weather. Look good . Got into the shower. My son woke ask if he could go told him go ahead get in shower and we would go get the plane out of the hangar and go get breakfast. Come back wait on Alex at the house. So we left the house to head to the airport to get plane out of hangar and to do per-flight aircraft. Did the per-flight inside hanger went threw the check list everything look okay. We open the hanger and pulled the plane out. Closed hanger back up and went to get breakfast and had back to house to get Alex. Alex got to the house so we got all in one vehicle to had back to the airport. 7:15 am Put are bags in the plane. did another walk around to make sure nothing got damage while where gone. I got into the plane in the left seat and Alex got into the right seat and my son got into the back seat on right side. Went trough the pre start check list and then started the plane up. Did my run-up check all my gages performed test on mags,carb heat. controls check. all checks check okay. note while we was doing are run up there was a plane on taxi way facing east. We pulled on to run way 27 scan gages again check okay and then push throttle for full power quick scan to rpm gage okay then watch MPH gage reach 70 then pulled off the ground to rotate then about 15 second into the flight in air we stop making altitude so drop the nose to gain more airspeed then the plane to level off for brief moment then it drop again then i push forward on the yoke to decided to put the plane back On ground best i could then we hit the hoop house at nursery with the front land gear then it threw us to side and then we stop. we all un buckle and got out of the plane. Then called 911
