NARRATIVE: On FRI 16 AUG 19 Reporting Officer YAGHOUTFAM, B #1605 as well as Officer BAUGHMAN, M #1623 were serving as the crew of the Omaha Police helicopter. At approx 0830 hrs, R/O's began conducting patrol over the city and assisting with radio calls in helicopter106PD. After approx 1 hr of flight, R/O's began heading back to the Blair Airport. When R/O's were 4-5 miles south of the runway, R/O YAGHOUTFAM conducted training in governor failure by rolling the throttle down just enough to take the governor off-line but still maintaining rotor RPM's within the green (good) range. R/O descended while maintaining airspeed until over the runway 30-50 feet above ground level at approx 45 knots of airspeed. R/O then rolled the throttle back on, announcing verbally, and the needles responded by rolling into the normal range, which was also announced verbally. The helicopter seemed to respond appropriately. It should be noted that if this were an actual governor failure, a run on landing would have been performed. Because the helicopter was loaded with all mission equipment and not wanting to put undo stress on that equipment, the intent had always been to recover from the maneuver at a safe airspeed. After the helicopter was back in normal operating conditions, R/O began to aft cyclic (slow down), to begin air taxiing to the parking pad east (right) of our current position. R/O looked right to begin taxiing and at that moment R/O heard an audible alarm. R/O turned back to the front and saw lights illuminated on the warning panel. At the same time, R/O saw the helicopter descending very rapidly toward the ground seemingly unable to maintain power and altitude. R/O dropped the collective briefly in an attempt to regain/save rotor energy but had to pull it back up in an attempt to cushion the landing. R/O focused on cushioning the landing best as possible and trying to maintain a level cabin for ground contact. It was apparent that a hard landing was going to ensue. When everything came to rest, the helicopter was on it's left side. R/O's began verbally checking on each other and both were responding. It is unknown if the engine was running when the helicopter came to rest but R/O went through the procedures of emergency shut down anyway, except for overhead circuit breakers which could not be reached. R/O's then exited the helicopter through the pilot's door and informed Sgt STRAUB #1946 of the situation. Appropriate notifications were made at that time by Sgt STRAUB who was on scene within minutes.

Matt Baughman

NARRATIVE: On FRI 16 AUG 19 Reporting Officers Baughman #1623 and Yaghoutfam #1605 were serving as the operating crew of the Omaha Police helicopter. At about 0830 hrs, R/O's began conducting patrol over the city and assisting with radio calls in helicopter106PD. After several radio calls and about an hour into the flight, r/o's ended the mission and turned towards the airport for landing. Approximately 4 miles to the south of the field R/O YAGHOUTFAM announced he would be conducting some training on one or two emergency procedures prior to landing. The first was going to be a governor offline procedure which he would terminate prior to the actual emergency termination requiring a full run on landing. It has been our practice to not conduct any "to ground" emergency procedures in any of our duty equipped helicopters. R/o Yaghoutfam was verbally walking through the procedure and began his termination procedure by attempting to roll on throttle. R/o Yaghoutfam could not get the throttle to recover and both officers noted an audible alarm, felt a loss of altitude, and braced for a potential hard landing. The helicopter impacted the runway firmly and very close to a cabin level attitude. Following that initial impact the helicopter flipped onto it's left side and a second impact was sustained. R/o's were both still buckled but Baughman was on the runway and Yaghoutfam was suspended above by his harness/seat belt. As soon as the helicopter parts stopped moving, Officer Baughman unbuckled himself, crawled into the nose of the helicopter and helped unbuckle Officer Yaghoutfam. R/o Yaghoutfam fell to the floor (TFO door) and would climb up and out of the pilot door and off the side of the aircraft. Officer Baughman grabbed the cockpit fire extinguisher as he exited as there was smoke coming from the engine compartment and a growing puddle of oil or gas coming from the underside of the aircraft. R/o's gathered a safe distance from the wreckage, conducted a physical check on one another and contacted command. Sgt. Straub was on scene in minutes.
