NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

On takeoff from Runway 18 at KJWY at 1200 CDT, I experienced total engine failure at approximately 400' AGL. I made a left turn to the closest available field and set up for landing. Less than 20 seconds elapsed between the moment of power loss to the landing flare. As I began the flare, the engine momentarily restarted and allowed a 100' gain in altitude, which was adequate enough to make an immediate left turn, clear a tree line, and continue toward the runway on a westerly heading before losing power again. I glided to the airfield at a right angle to the runway and touched down in the dirt/grass just short of the east side of the runway. On touchdown, the nose gear separated, and the airplane then slid across the runway, coming to stop just outside of the runway lights. I did not receive services at KJWY and intended to practice touch and go landings before returning to my home airport.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

As the cause of the engine failure is unknown at this time, it is not known how this accident could have been prevented.
