

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Fort Wayne State: IN

ZIP: 46809 Country: USA

Latitude: 40:55:5 N Longitude: 85:00:9 W

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 09/13/2019 Local Time: 1545

mm/dd/yyyy

Time Zone: Eastern

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N578SP

Manufacturer: Cirrus

Model: SR-22

Serial Number: 3578

Year of Manufacture: 2009

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☒ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 3400 lbs

Weight at Time of Accident/Incident: 3150 lbs

Number of Seats: 4 Flight Crew Seats: 2

Cabin Crew Seats: _____ Passenger Seats: 2

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
- ☐ Balloon
- ☐ Blimp/Dirigible
- ☐ Glider
- ☐ Gyroplane
- ☐ Helicopter
- ☐ Powered Lift
- ☐ Rocket
- ☐ Ultralight
- ☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

- ☒ Normal
- ☐ Aerobatic
- ☐ Balloon
- ☐ Commuter
- ☐ Transport
- ☐ Utility

Special

- ☐ Restricted
- ☐ Limited
- ☐ Provisional
- ☐ Special Flight
- ☐ Experimental
- ☐ Special Light-Sport
- ☐ Experimental Light-Sport

☐ Certificate of Authorization or Waiver (COA)

☐ None

☐ Unknown

Landing Gear

(Check all that apply)

☐ Retractable

- ☒ Tricycle
- ☐ Amphibian
- ☐ Emergency Float
- ☐ Float
- ☐ Hull
- ☐ Other Launch/Recovery System
- ☐ None
- ☐ Tailwheel
- ☐ High Skid
- ☐ Skid
- ☐ Ski
- ☐ Ski/Wheel
- ☐ Unknown

Engine Type (Select one)

- ☒ Reciprocating
- ☐ Turbo Shaft
- ☐ Turbo Prop
- ☐ Turbo Jet
- ☐ Turbo Fan
- ☐ Electric
- ☐ Liquid Rocket
- ☐ Solid Rocket
- ☐ Hybrid Rocket
- ☐ None
- ☐ Unknown

Fuel System Type (Reciprocating)

☐ Carburetor ☒ Fuel-Injected

Engine	Engine Manufacturer	Engine Model/Series	Manufacturer's Serial Number	Date of Mfg. mm/dd/yyyy	Rated Power ☐ Horsepower or ☐ lbs of Thrust	Total Time (hours)	Time Since: Inspection (hours)	Overhaul (hours)

Last Inspection Type

- ☐ 100-Hour
- ☐ AAIP
- ☒ Annual
- ☐ Continuous Airworthiness
- ☐ Conditional Inspection
- ☐ Unknown

Date Last Inspection: 07/26/2019 ⁺
mm/dd/yyyy

Airframe Total Time: 3248 hrs

hours measured at (Select one)

☒ Last Inspection ☐ Time of Accident/Incident

Type of Maintenance Program (Select one)

- ☒ Annual
- ☐ Conditional (Amateur-built only)
- ☐ Manufacturer's Inspection Program
- ☐ Other Approved Inspection Program (AAIP)
- ☐ Continuous Airworthiness
- ☐ Other, specify: _____

Description of Fire Extinguishing System

- ☒ None
- ☐ Specify: _____

Propeller 1

- ☒ Fixed Pitch
- ☐ Controllable Pitch
- ☐ Ground Adjustable

Manufacturer: Hartzell

Model: PHC-J3YF-1RF

Propeller 2

- ☐ Fixed Pitch
- ☐ Controllable Pitch
- ☐ Ground Adjustable

Manufacturer: _____

Model: _____

ELT Installed: ☒ Yes ☐ No

If Yes:

ELT Manufacturer: Artex

Model or Part No.: 453-6603

TSO No.: ☐ OC91 (121.5 MHz) ☐ OC91a (121.5 MHz)
☒ C126 (406 MHz)

Was ELT still mounted in aircraft? ☒ Yes ☐ No

Was ELT still connected to antenna? ☒ Yes ☐ No

Did ELT Activate? ☒ Yes ☐ No

If activated:

Did ELT Aid in Locating Aircraft? ☐ Yes ☒ No

If not activated:

- Indicate Reason:
- ☐ Impact Damage
 - ☐ Fire Damage
 - ☐ Battery Expired/Damaged
 - ☐ Unknown

Additional Equipment (Check all that apply)

- ☒ ADS-B
- ☒ Airframe Parachute
- ☒ Angle of Attack Indicator
- ☒ Autopilot
- ☐ Data Recorder
- ☒ Electronic Flight Bag or Handheld Device
- ☒ Electronic Multifunction Display
- ☒ Electronic Primary Flight Display
- ☐ Handheld GPS
- ☐ Heads Up Display
- ☒ Onboard Weather
- ☐ Satellite Tracking Device
- ☒ Stall Warning System
- ☐ Video Recording Device
- ☐ Other, Specify: _____

OWNER/OPERATOR INFORMATION**Registered Aircraft Owner**Name: Jim Giddings, Jagger LLCCity: Great FallsState: VAZIP: 22066Fractional Ownership Aircraft: ☐ Yes ☒ NoCountry: USA**Operator of Aircraft**☐ Same As Registered Owner☐ Same Address as Registered OwnerName: John M VerfurthCity: AshburnDoing Business As: PersonalState: VAZIP: 20148

Air Carrier/Operator Designator (4 Character Code): _____

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

No damage to other property. 578SP suffered significant damage upon hitting the ground; both main mounts and the nose wheel all collapsed or became detached. The wings seemed to have some damage, as well as the underside of the fuselage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Events of Friday, September 13th:

My wife and I took off in N578SP from Leesburg Airport (KJYO) at approximately 1100 hrs. on an IFR Flight plan heading to South Bend Airport (KSBN). I had completed a full pre-flight inspection and added 3/4 of a quart of oil before departing. The oil pressure was approximately 41-42 psi for the early part of the flight until we passed north of Columbus, when I noticed the psi beginning to decrease into the 30's. After the psi initially went below 30 and the low oil pressure light came on, I asked for a divert to Findlay Airport (KFDY). As I descended from 10,000' and pulled back on the throttle, the psi actually went up and back above 30 and into the green on the indicator (ended up approximately mid to high 40's when I landed).

About 15 minutes after shutting down the plane, I checked the oil which indicated I had approximately 6 quarts of oil. I was given the information for the maintenance services at Bluffton Airport (5G7), who came to KFDY to inspect my plane. Don and Brian were the two mechanics; after taking off the cowlings, they inspected the engine and checked for leaking oil. After confirming there were no signs of any oil leaks, and the engine still had approximately 6 quarts of oil, they adjusted the sensor and turned the pressure relief valve a quarter turn to tighten the valve. Don told me that the engine had not lost any oil as no leaks were seen at all. He said the transducer (sensor) should probably be replaced when I got back home, but that he adjusted it and the resistance will be slightly different; he also said the tightening of the relief valve should slightly increase the reading on the psi. We performed two turns at 1600 rpm and the psi read as high as 50, with the oil temperature also in the green. After we shut down the engine, Don confirmed the adjustments and said the plane was fine to fly, but I should look to replace the sensor if the reading continued to fluctuate. We got into the plane, started up and did a full run-up at 1700 rpm, again with good psi and temp results.

We took off VFR at around 1515 hrs, and picked up an IFR clearance once airborne; we were cleared to KSBN via radar vectors by Toledo Approach to avoid some convective clouds. Watching the psi closely, it was at 45 psi for the first 20 minutes or so. After a few vectors from ATC, we were clear of any weather and cleared direct to KSBN. Shortly after being cleared to destination we then had the emergency. I am not certain, but my recollection is the events happened essentially simultaneously: the engine stopped, the red oil pressure light came on, and a few gauges on the G1000 showed large red X's, indicating they were no longer receiving data. I did not notice a large bang, or anything of that nature, the engine just stopped running and bells and whistles started going on in the cockpit. I did not receive any indications, cautions or alerts before this happened. I immediately called Fort Wayne Approach and declared an emergency, asked for vectors to KFWA, and told them I had lost my engine. The next few minutes are obviously fairly intense, and my recollections are probably not in any particular order. I had my checklist already open on my knee pad (it is always open on my knee pad, an old Navy habit), and I immediately initiated the Engine Restart checklist, which I tried many, many times. I tried many variations with the throttle, the mixture, swapped fuel tanks, cycled the Boost pump, turned on the Alternate Induction Air, etc. During the next few minutes, I focused on trying to keep the airspeed as close as I could to 88 knots, keep heading towards FWA, and attempting to start the engine. The propeller continued to windmill strongly, giving me false hope I could get this restarted. About half way through this, the propeller came to a full stop, and when I tried the engine restart again, it began to turn and windmill - again giving me false hope I might be able to make the airport. At no time during this evolution, did I ever see the power move from 0%; I cannot recollect what the oil temp or oil pressure gauges were reading. My focus was on airspeed, heading and the restart procedure. My communication with Fort Wayne Approach was fairly consistent, as they were ready to help, and suggested I consider landing on the highway (they pointed out the highway to me specifically). I gave no consideration to that option as I believe the least dangerous option for us and others would be to deploy the parachute. My last recollection is asking Approach my distance to the airport (which I believe they responded 6 or 8 miles), and that is when I realized I would not make the airport and I needed to pull the chute. I had been watching and was trying to get to the open plowed dirt field, and get by houses and a power line - I delayed pulling the handle until I had passed the power line, then pulled it as I hoped I was heading to the plowed field. It turns out, I missed the field by about 10 feet, but missed the house and the power line as well. Upon hitting the ground, I immediately egressed from the plane, and went to the passenger side and helped my wife out. We then moved about 20 yards or so behind the plane to remain a safe distance away. I crossed the street and asked the homeowner if I could dial 911 and let the authorities know where we landed; then went back to the plane and waited for everyone to arrive.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

I do not know what part of the engine had the problem, but have been told something pierced a hole in the engine casing; so I believe this is what caused what I assume to be some type of catastrophic engine failure.
