

RECORD OF CONVERSATION

Timothy N. Sorensen
Aviation Accident Investigator
Central Region

Date: September 23, 2019
Person Contacted: Kathy Peterson
NTSB Accident Number: CEN19MA312 – Monclova, Ohio

Narrative:

Ms. Peterson reported that she and Mr. Peterson had stayed home much of the weekend. He was aware that he might have a flight the following week. Mr. Taylor had called the afternoon before the accident to inform him the planned flight was confirmed. Mr. Peterson then gathered his things and left for the airport.

Ms. Peterson stated that there had not been many paid flights recently. Mr. Peterson had completed some training flights a few weeks before the accident; however, she was uncertain of the exact dates. That was the most recent flying he had done. Mr. Peterson had not mentioned any on-going mechanical issues with the airplane.

Ms. Peterson noted that Mr. Peterson did not have any health issues that might have adversely affected his fitness for flight. He did take medication to control blood pressure; she was not aware of any other medications. Mr. Peterson would normally go to sleep sometime after midnight and sleep until late morning. He did not have any history of sleep apnea.
