

RECORD OF CONVERSATION

Timothy N. Sorensen
Aviation Accident Investigator
Central Region

Date: September 19, 2019
Person Contacted: Marilyn Taylor
NTSB Accident Number: CEN19MA312 – Monclova, Ohio

Narrative:

Ms. Taylor reported that Mr. Taylor had been flying cargo for a long time. He was widely considered to be “professional.” He was aware of his sleep requirements and would plan accordingly for over-night cargo flights. He had over 24-hours prior notice for the accident flight.

Ms. Taylor stated that they maintained homes in San Antonio and Laredo. Mr. Taylor was in San Antonio over the weekend. His activities were routine and he did not do any flying. On Monday morning (Sept. 9), Mr. Taylor had a dentist appointment and then he drove to Laredo. She recalled hearing from him about 6:00pm on Tuesday evening (Sept. 10) as they were fueling the airplane before departure.

Ms. Taylor noted that Mr. Taylor did not have any health issues, nor did he take any medications, that might have adversely affected his fitness for flight. He had passed an FAA flight physical the week before.
