NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was performing a series of stop and goes at the private grass strip LA54. For the 2nd stop, I landed on runway 26 and was taxiing back to the east end to prepare for a 3rd stop and go. As I was making a wide right turn, the left wing strut contacted a short 4.5' utility pole.

Upon contact the wing strut buckled. The, lower end of the strut, where it attaches below the left door, sheered off. The wing, no longer supported, came down to rest on top of the pole.

Of course, I take full ownership of the accident, but below are some circumstances leading to the nature of the accident:

1. The Aeronca 65C has poor forward visibility, and I failed to notice and avoid the short obstacle. My eyes were in the direction of the turn (right) not left.

2. Due to maintenance and personal reasons, I had not flown in the last 3 months, and this flight was for reacquainting myself and reorientation as well as personal enjoyment (which came to an abrupt end)...

3. The pole supplied electrical power to a travel trailer. The travel trailer however was removed and the height of the pole was reduced from about 10' to 4 1/2'. The creosote pole is dark in color, and it blends in well with the trees and foliage in the background. The obstacle location was neither marked nor identified in any way.
