NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

On September 15, 2019 I departed KTIK (SpaceCoast, Titusville FL) VFR at approximately 8:30 a.m. local time with full fuel (140 gal.) on a return flight to San Diego, CA (KSEE) - planned fuel stop in Ozona, TX. Weather and flight were VFR and remained VFR throughout the entirety of the flight. After crossing KGPT (Gulfport, MS) TRSA at 10,500 I initiated a slow descent arriving over the Mississippi River near Boothville and proceeded southbound.

I continued my descent along the river and passed the mouth of the river at approximately 1,500 MSL. Thereafter, I configured the aircraft for a climb to continue on to Ozona, TX; however, the engine did not respond to the application of power and the aircraft began losing altitude.

I immediately commenced the PA-46 emergency checklist, but was unable to increase power and prepared for a water landing in the Gulf. Prior to splashdown I made two radio calls declaring an emergency, one to Houston Center and the other over the emergency frequency (121.5) with radial and distance off Leesville VORTAC. I did not receive a reply and activated the aircraft ELT prior to landing. After landing, I exited the aircraft through the emergency exit, collecting potentially useful items from the cabin (life jacket & cell phone). I remained on the wing until the aircraft submerged.

Approximately 1 hour later a USCG helicopter picked me up and transported me to W. Jefferson Memorial Hospital in New Orleans. I did not receive any injuries and was discharged from the hospital a few hours later.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I am as yet unsure as to the cause of loss of power. From an altitude of 1,500 feet there was no possibility of choosing a more suitable landing site.
