

Mr. Veselka,

Per your request, below is my recollection of the events of the accident flight of Citabria 5183X on 22 May 2020 with James Story.

I was a passenger on this flight local to Carbondale. I handled radio communications while James flew as the PIC. The flight seemed normal throughout until the last landing. During the last landing, James landed us on 18R. During the landing we moved toward the left side of the runway. The drift stopped but the next thing I knew we had impacted the pavement with the nose of the aircraft and the tail slammed back down bringing us to rest. We vacated the aircraft and Carbondale Ops1 arrived to check on us.

If you have any questions, please call me at [REDACTED] or email at [REDACTED].

[REDACTED]
