NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

At about 10 AM CDT on the day of the accident I went to 5C1. Did a walk around of aircraft and found all to be in order. Taxied to active runway. Did standard run up and departed RW 17. Climbed to 3500 MSL. Flew South. Practiced some climbs, turns and slow flight. Arrived at KCVB about 30 minutes later. Sky was clear and wind was light. Practiced 4 full stop 4 point landings. Practiced 2 wheel landings. No problems. Flew back to 5C1 and landed. No problem. Around 2:30 PM CST. Returned to 5C1. Filled tanks with fuel. Bob Bruce (about 200 lbs) got in the back seat. Normal start, run up and take off. Flew back to CVB. On landing the nose turned slightly to the right at touch down. I corrected with rudder to the left. The plane turned sharply to the left and I could not correct with rudder and brakes. Plane went off the left side of the runway and stopped. The Right wing tip and right tip of horizontal stabilizer hit the ground. After stopping and then restarting engine I taxied the plane to the ramp. No proper engine damage.
