

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: White owl State: SD

ZIP: 57792 Country: usa

Latitude: 44.605122 Longitude: -102.382973

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 08/16/2020 Local Time: 8:00pm

mm/dd/yyyy

Time Zone: central

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N6643Y

Manufacturer: Beechcraft

Model: V35B

Serial Number: D-10264

Year of Manufacture: 1979

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☒ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 3400 lbs

Weight at Time of Accident/Incident: 3100 lbs

Number of Seats: 4 Flight Crew Seats: 2

Cabin Crew Seats: _____ Passenger Seats: 2

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
- ☐ Balloon
- ☐ Blimp/Dirigible
- ☐ Glider
- ☐ Gyroplane
- ☐ Helicopter
- ☐ Powered Lift
- ☐ Rocket
- ☐ Ultralight
- ☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

- ☒ 100-Hour
- ☐ AAIP
- ☐ Annual
- ☐ Continuous Airworthiness
- ☐ Conditional Inspection
- ☐ Unknown

Date Last Inspection: 12/07/2019
mm/dd/yyyy

Airframe Total Time: 3361.7 hrs

hours measured at (Select one)

☒ Last Inspection ☐ Time of Accident/Incident

Type of Maintenance Program (Select one)

- ☒ Annual
- ☐ Conditional (Amateur-built only)
- ☐ Manufacturer's Inspection Program
- ☐ Other Approved Inspection Program (AAIP)
- ☐ Continuous Airworthiness
- ☐ Other, specify: _____

Description of Fire Extinguishing System

- ☐ None
- ☒ Specify: fire extinguisher by pilot seat

Propeller 1

- ☐ Fixed Pitch
- ☒ Controllable Pitch
- ☐ Ground Adjustable

Manufacturer: McCauley

Model: 3A32C76-5-M

Propeller 2

- ☐ Fixed Pitch
- ☐ Controllable Pitch
- ☐ Ground Adjustable

Manufacturer: _____

Model: _____

ELT Installed: ☒ Yes ☐ No

If Yes:

ELT Manufacturer: Artex

Model or Part No.: 345

TSO No.: ☐ OC91 (121.5 MHz) ☐ OC91a (121.5 MHz)
☒ C126 (406 MHz)

Was ELT still mounted in aircraft? ☒ Yes ☐ No

Was ELT still connected to antenna? ☒ Yes ☐ No

Did ELT Activate? ☒ Yes ☐ No

If activated:

Did ELT Aid in Locating Aircraft? ☐ Yes ☒ No

If not activated:

- Indicate Reason:
- ☐ Impact Damage
 - ☐ Fire Damage
 - ☐ Battery Expired/Damaged
 - ☐ Unknown

Additional Equipment (Check all that apply)

- ☒ ADS-B
- ☐ Airframe Parachute
- ☐ Angle of Attack Indicator
- ☒ Autopilot
- ☐ Data Recorder
- ☒ Electronic Flight Bag or Handheld Device
- ☒ Electronic Multifunction Display
- ☒ Electronic Primary Flight Display
- ☒ Handheld GPS
- ☐ Heads Up Display
- ☒ Onboard Weather
- ☐ Satellite Tracking Device
- ☒ Stall Warning System
- ☐ Video Recording Device
- ☐ Other, Specify: _____

OWNER/OPERATOR INFORMATION**Registered Aircraft Owner**Name: James A. BreitCity: Sioux FallsFractional Ownership Aircraft: ☐ Yes ☒ NoState: SD ZIP: 57108Country: USA**Operator of Aircraft**☒ Same As Registered Owner☒ Same Address as Registered Owner

☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left landing gear ripped off. Right and nose gear collapsed under plane. Bend prop, and engine bent down with damage mostly forward of firewall. Left wing partly separated from body of plane and dented bad. Right wing looks ok. One crack in pilot side window. No interior damage, baggage door shuts but doesn't lock..

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On August 16, around 8pm I attempted to depart from a private soft field runway (2400ft long, 50ft wide) located in White Owl, SD to return home (Y14) after a 3 day stay at the Rifle ranch. It was a beautiful evening with the wind slowing down and temperature dropping.

Conditions were dry and VMC. I lined up on the east end of the runway putting my take off run slightly uphill toward a low fence into the slight wind, vs the other direction that faced east toward the house and power lines. Three souls were aboard, my brother Lance and his wife Melissa, along with some baggage and 35 gallons of fuel totaling 3047 pounds of 3400 max takeoff weight . I throttled to full power and released the brakes while pulling back on the yoke to keep front wheel light. I did not use flaps, and 3 of trim. As we accelerated I had increasing trouble keeping the plane from going left. I never got a good look at the airspeed but the plane felt like it was close to flight and that's when I went off the runway to the left. I continued thinking the plane was going to lift off. The grass was thicker and terrain more rough. We traversed a small ditch that launched the plane into the air in a more southward direction straight for a row of hay bails. The plane didn't climb nor sink and it did not respond to turning the yoke full right. My left wheel struck the top of the hay bails, turning the plane sideways, where it skidded on its belly off the hay bails onto the ground. All the gear collapsed. No one was injured. The ELT activated. I shut off the plane, fuel and ELT. It was around 8:30 at night. We left the plane and drove back to Sioux falls. I called the FAA the next morning around 900am.

The plane (n6643Y) ended up facing directly south, flat on its belly. One wheel was found by the hay bails around 30 feet back. The prop was bent and engine compartment bent downward. The left wing badly damaged, the right wing was better. The rest of the plane was intact, with no broken glass, and doors all shut the same.

The runway is dragged twice a year and is used frequently by the rancher for flying. He has been an active pilot for 50 years. His name is Grant Simons. The south edge of the runway has a grain bin about 1/3 down from the east end and a row of hay bails 30 yards farther off to the south about 1/3 the way to the west end. The ground was hard packed and the grass was short.

The plane ended stopping on the west side of the row of hay bails. Several hay bails were moved about 10 feet out of line according to the Mr. Simons. Review of the flight data reported the maximum speed reached was 51.6 kts.

A review of my performance: At an altitude of 2500 ft, temp 26 C , altimeter 30.17 , Density altitude 4000ft, grade of 2% on dry hard field with a weight of 3047 lbs my takeoff roll was 1450 ft, leaving 950 feet to spare. I actually started my ground roll farther off the runway at the farmers driveway using a narrow gravel road that led to runway (another 30-40 yards or so), but this road also led me to the left edge of the runway. All in all from a performance standpoint I think the plane should have been able to takeoff safely given the right pilot controls.

James A. Breit

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

This was completely pilot error. I had not performed a soft field takeoff in 2 years. Prior to that I had done many soft field and short field takeoffs during my private pilot training which was in a Cessna 150. I recalled them as being fairly easy. I checked my log book and noted that during my transition to a V tail I had done loads of cross wind landings but no soft field takeoffs. On asphalt runways when the wheels leave the ground the solid feel of directional control is lost as you transition to the air. I wrongly thought this was happening, but in reality the wheels were simply skidding on the dirt and grass.

I kept going when I should have stopped! I failed to look at airspeed to confirm. That's an important failure. I could have instructed my passenger in the right seat to call out my airspeeds to ensure I knew them.

Poor technique. I held the nose of the plane up too high, this obstructed my view somewhat and slowed my acceleration. I should have held the yoke more neutral instead of so far back. I should have practiced that technique.

FLAPS: The use of flaps was taken out of the POH for newer bonanzas according to some research I have done, but older POH describe using 10-20 degrees of flaps. I should have used may approach flaps. I would have known this if I had practiced and gotten to know my plane better in these situations. I could of asked any number of more experienced pilots I have on speed dial.

On a private runway such as this, that I had never taken off on, I should have taxied down it once at maybe 1/2 throttle to get a feel for it and gauge my airplanes performance.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

Rudder control, I was hard on the rudder, but could have started more on the right side of the runway, and if that failed leave my front wheel down longer.

Mentality. I had a 'I am going to do this' attitude- kind of psyching myself up because I was a little nervous. I am not sure this is the macho attitude or invulnerability, but my mind set should have been 'I am going to try this, but if anything doesn't seem perfect, I am going to abort.' I haven't really practiced rejected takeoffs--this is another maneuver I need to practice.

Waiting until morning for colder air, more wind, or even using the highway was an option by contacting local authorities. Lightening the load, via passengers, fuel, or baggage could have been good considerations.
