Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Nose gear and right gear torn off. Left gear collapsed. Both wings bent and twisted. All propeller blades sheered off. Left nose section skin bent.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On September 8, 2020 I purchased N972DD. My insurance provider had as a condition of soloing the aircraft that I was required to obtain initial ground and flight training from a flight school approved by the insurance company which included 10 hours of flight time. I contacted Casey Aviation Inc to provide this training and was told that Ben Casey would be my instructor. On September 13th, Ben and I flew to Chicago to pick up the plane. On September 14th, 2020 we began my training; departing from Aurora IL (KARR) and flying to Addison TX (KADS). We continued the training on September 15th without incident. On September 16th, we began the day at KADS and flew to KLFK where we had lunch and added fuel. We departed KLFK and flew to KJSO. En route, we practiced various maneuvers. At about 1:30 pm we landed full stop at KJSO. Ben instructed me to taxi to runway 32 and to perform a "no flap" take off. Once airborne, he instructed me to make a left traffic pattern and that we would be doing an "engine out" landing. He told me that he would be pulling back the power on downwind and when he did so that I was to turn "base and not add flaps until I had the runway made". He pulled the power on downwind at 1400 feet MSL and I turned base. He instructed me to slow the aircraft to 95 knots, the best glide rate and I did so. He then instructed me to "turn towards the end of the runway" which I did and that was the last instruction I received. I overshot the centerline and the aircraft became positioned over the grass on the East side of the runway. I attempted to turn the aircraft back towards the runway and saw the airspeed quickly declining so I added full power but was already too low to recover. The plane struck the ground at the East edge of the runway and came to rest on the runway. Ben shut off the engine. I turned off the master power and we both exited the aircraft.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Better communication. A preflight briefing that described the procedure being taught and the proper execution of the procedure.

When the plane was less than 500 feet AGL and not lined up with the centerline as PIC/CFI Ben should have either (a) instructed me to do a go-around or (b) taken control of the plane.
