Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Right wing damaged near wingtip landing light. Right wing separated from fuselage at root of wing.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed 3CK at 9pm with intent to go land at 6IL2 (soft field; no runway lights). Got automated weather at 3CK; wind was from 080 at 9kts. I intended to land on runway 07. I had a friend with Jeep floodlights lighting up the runway.

I ended up landing about 10-20 feet to the right of the runway and a few seconds after touching down the right wing hit a tree sapling near the wingtip and the aircraft skidded to the right at which point I came to a full stop; shut off fuel, avionics, master, all switches.

I then called my chief flight instructor at Blue Skies Flying Services to tell him what had happened. He came to the site of the accident and we called the NTSB together to satisfy immediate notification.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Do not attempt to land on a runway at night without runway lighting; especially a grass strip.
