I have a vidieo that could shed light on the accident. my friend and i went on a discovery flight with mr. turner just after Christmas. I am a student pilot and I jumped on the opportunity to log hours for 100 bucks. he was advertising on facebook market I fly a pa28 out of kcos only difference is the one I fly is a 180. we normally put 10 gallons of fuel in when we fly 3 people, on this day mr. turner put 20 gallons of fuel in for a 1hr flight with 3 people. we were in a stall from the moment the plane took off. I never told mr Turner until much later that I was a student pilot an I voiced concerns about lack of airspeed an the plane wasnt gaining altitude. in the vid you can see all this. this is only part of the vidieo as it's too large to send the whole thing.

kevin
