Hello Paul,

Thanks for your patience. So far as I know everybody associated with ForeFlight is healthy, and across the company we're taking steps to try to ensure we remain that way.

No flight plans were filed through ForeFlight for N157SF on or around March 3, 2020 and I was unable to locate any weather briefings we generated for N157SF on March 3, 2020.

I did find a ForeFlight account that appears to be a match for [REDACTED], and it includes N157SF as an aircraft used by the pilot.

That account had entered a couple of routes prior to the flight:

^^^

Date/Time (UTC) Updated Route String

3/3/2020 13:17:19 KBMI C15
3/2/2020 10:40:34 KBMI KMDH
^^^

This account had not viewed any instrument procedures in the app immediately prior to the flight.

The account viewed these airports in the app prior to the flight. NOTE the Sync system does not record what information was viewed on a particular airport:

^^^

Last viewed (UTC) Airport ID

3/3/2020 13:19:47 KDPA
3/1/2020 18:56:51 KRIC
^^^

The account had not viewed any static Weather Imagery prior to the flight.

Let us know if you need anything else on this one,
