Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft made an emergency landing between trees and wings folded back. Substantial damage to wings, landing gear, and rear part of cabin.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The student taxied from the KROS ramp area on his first solo at 19:00Z. He performed his preflight check, announced his departure from RWY 16, proceeded to take-off at 19:05Z, climbed to 200' AGL, engine started sputtering and proceeded to fail. The student established the best rate of glide @ 65 Kts. and picked the best available spot to land the aircraft trying to avoid the powerlines that were ahead. The aircraft came to rest between trees which folded the wings back. He shut, the fuel off, mixture lean, mags off, and master off. He then proceeded to exit the aircraft through the pilot's side window. The wreckage rested on an embankment about 200 feet from Rush Creek. The Chisago County Sheriff's Dept. and Rush City Fire Dept. were on the scene shortly after. The student was uninjured.
