

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Highway 16, Bandera State: TX

ZIP: _____ Country: USA

Latitude: 29.44N Longitude: 98.58W

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 01/11/2020 Local Time: Approx. 17:20
mm/dd/yyyy

Time Zone: CST

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N350XL

Manufacturer: Piper

Model: PA-46-350P

Serial Number: 4636673

Year of Manufacture: 2015

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☒ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 4358 lbs

Weight at Time of Accident/Incident: Approx. 4000 lbs

Number of Seats: 6 Flight Crew Seats: 2

Cabin Crew Seats: _____ Passenger Seats: 4

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☐ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

- ☒ Normal
☐ Aerobatic
☐ Balloon
☐ Commuter
☐ Transport
☐ Utility
☐ Restricted
☐ Limited
☐ Provisional
☐ Special Flight
☐ Experimental
☐ Special Light-Sport
☐ Experimental Light-Sport

☐ Certificate of Authorization or Waiver (COA)

☒ None

☐ Unknown

Landing Gear

(Check all that apply)

☒ Retractable

- ☐ Tricycle ☐ Tailwheel
☐ Amphibian ☐ High Skid
☐ Emergency Float ☐ Skid
☐ Float ☐ Ski
☐ Hull ☐ Ski/Wheel
☐ Other Launch/Recovery System
☐ None ☐ Unknown

Engine Type (Select one)

- ☒ Reciprocating ☐ Liquid Rocket
☐ Turbo Shaft ☐ Solid Rocket
☐ Turbo Prop ☐ Hybrid Rocket
☐ Turbo Jet ☐ None
☐ Turbo Fan ☐ Unknown
☐ Electric

Fuel System Type (Reciprocating)

☐ Carburetor ☒ Fuel-Injected

Engine	Engine Manufacturer	Engine Model/Serial	Manufacturer's Serial Number	Date of Mfg. mm/dd/yyyy	Rated Power ☒ Horsepower or ☐ lbs of Thrust	Total Time (hours)	Time Since: Inspection (hours)	Overhaul (hours)
Eng. 1	<u>Lycoming</u>	<u>540AE2A</u>	<u>L-14193+61A</u>	<u>2015</u>	<u>350</u>	<u>517.2</u>	<u>3.9</u>	
Eng. 2								
Eng. 3								
Eng. 4								

Last Inspection Type

- ☐ 100-Hour ☐ Continuous Airworthiness
☐ AAIP ☐ Conditional Inspection
☒ Annual ☐ Unknown

Date Last Inspection: 11/27/2019
mm/dd/yyyy

Airframe Total Time: 511.3 hrs

hours measured at (Select one)

☒ Last Inspection ☐ Time of Accident/Incident

Type of Maintenance Program (Select one)

- ☒ Annual
☐ Conditional (Amateur-built only)
☐ Manufacturer's Inspection Program
☐ Other Approved Inspection Program (AAIP)
☐ Continuous Airworthiness
☐ Other, specify: _____

Description of Fire Extinguishing System

- ☐ None
☒ Specify: in cabin handheld fire extinguisher

Propeller 1

- ☐ Fixed Pitch
☒ Controllable Pitch
☐ Ground Adjustable

Manufacturer: Hartzell 3 Blade Composite

Model: HC-13Y1-1N

ELT Installed: ☒ Yes ☐ No

If Yes:

ELT Manufacturer: Artex

Model or Part No.: ME 406

TSO No.: ☐ C91 (121.5 MHz) ☐ C91a (121.5 MHz)
☒ C126 (406 MHz)

Was ELT still mounted in aircraft? ☒ Yes ☐ No

Was ELT still connected to antenna? ☒ Yes ☐ No

Did ELT Activate? ☒ Yes ☐ No

If activated:

Did ELT Aid in Locating Aircraft? ☒ Yes ☐ No

If not activated:

- Indicate Reason: ☐ Impact Damage
☐ Fire Damage
☐ Battery Expired/Damaged
☐ Unknown

Propeller 2

- ☐ Fixed Pitch
☐ Controllable Pitch
☐ Ground Adjustable

Manufacturer: _____

Model: _____

Additional Equipment (Check all that apply)

- ☒ ADS-B
☐ Airframe Parachute
☐ Angle of Attack Indicator
☒ Autopilot
☐ Data Recorder
☐ Electronic Flight Bag or Handheld Device
☒ Electronic Multifunction Display
☒ Electronic Primary Flight Display
☐ Handheld GPS
☐ Heads Up Display
☒ Onboard Weather
☐ Satellite Tracking Device
☒ Stall Warning System
☐ Video Recording Device
☐ Other, Specify: _____

OWNER/OPERATOR INFORMATION**Registered Aircraft Owner**Name: Mission Flight Charter Services, LLCFractional Ownership Aircraft: ☐ Yes ☒ No**Operator of Aircraft**☒ Same As Registered Owner☒ Same Address as Registered Owner

Name: _____

City: _____

Doing Business As: _____

State: _____ ZIP: _____

Air Carrier/Operator Designator (4 Character Code): _____

Country: _____

Operating Certificates Held

(Check all that apply)

- ☒ None
☐ Flag Carrier Operating Certificate (FAR 121)
☐ Supplemental
☐ Air Cargo
☐ Foreign Air Carriers (FAR 129)
☐ Rotorcraft External Load (FAR 133)
☐ Commuter Air Carrier (FAR 135)
☐ On-Demand Air Taxi (FAR 135)
☐ Commercial Air Tour (FAR 136)
☐ Agricultural Aircraft (FAR 137)
☐ Pilot School (FAR 141)
☐ Certificate of Authorization or Waiver (COA)
☐ Commercial Space Transportation
Experimental Permit
☐ Commercial Space Transportation License
☐ Other Operator of Large Aircraft

Regulation Flight Conducted Under

- ☒ FAR 91 ☐ FAR 129 ☐ FAR 415
☐ FAR 103 ☐ FAR 133 ☐ FAR 431
☐ FAR 121 ☐ FAR 135 ☐ FAR 435
☐ FAR 125 ☐ FAR 137 ☐ FAR 437
- ☐ FAR 91 Special Flight
☐ Non-US, Commercial
☐ Non-US, Non-commercial
- ☐ Public Aircraft (Select one)
☐ Armed Forces
☐ Federal
☐ State
☐ Local
☐ Unknown

Revenue Operation for FAR 121, 125, 129, 135

(Select one for each group)

- ☐ Scheduled or Commuter ☐ Domestic
☐ Non-Scheduled or Air Taxi ☐ International
- ☐ Passenger
☐ Cargo
☐ Mail Contract Only

Purpose of Flight for FAR 91, 103, 133, 137

(Select one)

- ☐ Aerial Application ☐ Firefighting ☐ Unknown
☐ Aerial Observation ☐ Flight Test
☐ Air Drop ☐ Glider Tow
☐ Air Race/Show ☐ Instructional
☐ Banner Tow ☐ Other Work Use
☒ Business ☐ Personal
☐ Executive/Corporate ☐ Positioning
☐ External Load ☐ Skydiving
☐ Ferry

Revenue Sightseeing Flight☐ Yes ☒ No**Air Medical Flight**☐ Yes ☒ No**AIRPORT INFORMATION** (Fill in if accident/incident occurred on approach, landing, takeoff, departure, or within 3 miles of an airport)

Airport Name: _____

Distance From Airport Center: _____ sm

Airport Identifier: _____

Direction From Airport: _____ degrees true

Proximity to Airport: ☐ Off Airport/Airstrip ☐ On Airport/Airstrip ☐ N/A

Airport Elevation: _____ ft. msl

Runway Information

Runway ID: _____ (L/R/C) Length: _____ ft Width: _____ ft

Runway/Landing Surface (Check all that apply)

- ☐ Asphalt ☐ Grass/Turf ☐ Macadam ☐ Water
☐ Concrete ☐ Gravel ☐ Metal/Wood
☐ Dirt ☐ Ice ☐ Snow ☐ Unknown

Condition of Runway/Landing Surface (Check all that apply)

- ☐ Dry ☐ Snow-Compacted ☐ Water-Calm
☐ Holes ☐ Snow-Crusted ☐ Water-Choppy
☐ Ice Covered ☐ Snow-Dry ☐ Water-Glassy
☐ Rough ☐ Snow-Wet ☐ Wet
☐ Rubber Deposits ☐ Soft
☐ Slush-Covered ☐ Vegetation ☐ Unknown

Approach/Departure Segment (Select one)

- ☐ Taxi ☐ VFR Departure ☐ On Instrument Approach ☐ Downwind ☐ Low Approach

Pilot Certificate # [REDACTED]

Aircraft Registration and Serial number: N350XL S/N 4636673-2015 Piper M350

On Saturday 1/11/2020 I arrived at the FBO (Signature North- Sat) around 3:30 pm CST, I completed a pre flight inspection and sampled the fuel with no abnormalities found, then at approximately 4:20 pm I departed San Antonio International (KSAT) on a round robin instrument flight plan. My flight plan was filed with a final altitude of FL240, my route was as follows: KSAT ALISS5 JCT CSI2 KSAT, my initial clearance was to fly runway heading and maintain 5000 feet, upon receiving take off clearance, I was cleared for takeoff from runway 31L @ intersection W with a turn to a heading of 340. Take off was normal, airplane performed as expected, I received further vectors for my climb before being cleared direct to TATAR and eventually cleared to flight level 240,

Upon reaching JCT I heard an unusual sound coming from what I believe is the engine, it was a thrumming or whirring sound as if metal was spinning and rubbing against metal, my passenger, who is also a pilot told me later after we landed that he also noticed the sound. At the time I heard it, all of my engine indications were as expected and I didn't notice any degraded performance so I thought to myself it was probably nothing, and since we were already on our way back to KSAT, I didn't worry about it too much. For planning purposes, I asked the controller what altitude should we expect to cross BENEY at and he said to expect 6000 with the next controller, so I programmed 6000 feet at BENEY into the vertical navigation profile and it showed a top of descent that was within 1 minute and at a rate of almost 2000 feet per minute, sometime later we were almost over the town of Kerrville, the controller instructed me to cross benny at 6000 feet, so since there wasn't enough time and distance for the VNV profile to capture, and given the distance from where we were at that point in relation to BENEY, in order to maximize our rate of descent I began a descent in flight level change mode FLC at 165 KIAS with the help of the speed brakes so that VNV which was armed can eventually catch up to FLC and cross BENEY at 6000 feet, while descending through somewhere between FL210 and FL200 I extended the gear to further maximize the rate of descent to meet the crossing restriction while maintain airspeed within the green arc (165 KIAS), then eventually VNV captured.

Descending through approximately 11000 feet, I received a "descend and maintain 6000" instruction from ATC, so I was no longer required to cross BENEY at 6000 feet so I decided to switch from VNV to FLC @ 125 KIAS to slow the rate of descent temporarily along with my airspeed to be able to retract the landing gear which has a retraction speed of no more than 126 KIAS, I kept the speed brakes out until I reached the target airspeed and retracted both the gear and then the speed brakes. Almost immediately after that a CAS message came up on the PFD, and the message was AV1 FAN FAIL, the message was white in color which was my indication that it was advisory in nature because I know that Red is Warning, Yellow is Caution, and White is advisory. Nevertheless, I looked back at the intake vent located below the aft passenger seats in the plane, which is where the avionics fans draw their air for cooling the avionics; to see if the intake was blocked, it wasn't. Then I reached for the G1000 cockpit reference guide to decode the CAS message and see what the recommended procedure is for dealing with it.

As I was flipping through the pages, smoke started to come into the cabin in front of us, I immediately suspected an electrical fire, I disconnected the autopilot, dropped the gear, turned battery master switch off, and dumped cabin pressure, and turned the EMER switch on, and as an abundance of precaution I pulled the hydraulic pump circuit breaker just in case it was the cause of the electrical fire, I quickly reached for and handed the emergency checklist to my friend and told him to read out the challenges of the electrical fire portion, we ran through the checklist and completed it, and made a MAYDAY call on the frequency which went unanswered. Meanwhile I pushed the NRST button on my PFD and saw that Boerne Stage Airfield (5C1) was approximately 13 miles east of our position, and the plane was in a 600 foot per minute descent despite a slight pitch up attitude I was holding, smoke was still coming into the cabin, my eyes were burning and I felt that we may eventually choke as a result of the smoke or worse; actual fire may penetrate the panel, I judged that in order to meet that emergency, save my life and my passenger's life; I needed to land immediately and without delay, I pushed the throttle, RPM, and mixture control all of the way forward so that I can establish a climb to get a better visual and reestablish communication and kept my pitch attitude at about 2 or 3 degrees, despite my power settings, my PFD was still showing a descending VSI of approximately 500 to 600 feet per minute and my speed was in the 120 to 130 range, I also had a red X indication over the Manifold Pressure gauge. Even though the prop was spinning, engine sound was low compared to what I'm used to hearing and it was producing what felt to me and my passenger little or no thrust, that; combined with the loss of altitude despite the power lever position and the pitch attitude, as well as the electrical fire further affirmed my decision to land immediately.

By that time, I believe we were at an altitude of somewhere between 3000 to 4000 feet indicated, I had KSAT's most current altimeter setting keyed in, I knew that the height of the terrain in the area was between 1000 to 2000 feet so I knew we were probably no more than 1500 to 2000 feet AGL, and given the rate of descent, I had about only a few minutes to land, the best choice for a landing field appeared to be ahead of us, it appeared to be a flat field and our landing direction would be into the wind based on the wind reading from my PFD, I picked my aiming point and went for it, as I

got close, it became clear that what appeared to be a large field was actually made up of three rectangular fields separated by fences, the last fence was followed by thick trees, so I decided to land in the third field and planned on braking heavy to stop, approaching the landing point I had one notch of flaps in, as we crossed the fence I put the plane on the ground and immediately realized we are extremely fast to stop within the remaining distance and a collision with the fence and trees would be unavoidable, I judged that I had enough airspeed and momentum to try to clear the trees, maybe even land on top of them rather than in them so I went for it and rotated, I was able to clear them, then I saw a street to my right, and immediately turned towards it to my right (HWY 16 I later found out) and landed onto it, cars moved out of our way, once we touched down and I started to heavily brake, a street sign to the right clipped the right wing which immediately turned the plane 90 degrees to the right causing it to collide with the guardrail and come to a complete stop, I insured that the fuel is in the cut off position and exited the plane, people standing by called emergency services, they showed up within minutes and secured the scene.
