Helicopter damage beyond repair.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Original departure of flight was from home (1750 CR 323, Jourdanton, TX 78026) on 1/24/2020. Pilot flew to personal lease in Charlotte, TX at approximately 3:30 PM. Pilot herded animals for his family into a pen. Pilot then shut down the helicopter and moved the animals across the ranch by truck and trailer. Upon finishing this, the pilot began flight around 5:45 PM to depart back to home in Jourdanton, TX. Upon entering the air, the pilot saw feral hogs in the next pasture. He turned back around with the intention of going back to land and to pick up a helper on the ground in order to eradicate hogs in the pasture that is used for crops. The sun was directly in the pilot's face along with a large column of dust from the plowed field and rotor wash. The pilot reports that he made a pedal turn to land and struck a power line next to the road with the tail rotor. It began to spin which sent him forward against the seatbelt. He pulled the cyclic into his stomach to attempt to maintain level flight. He dropped the collective to eliminate altitude and then hit the ground on the edge of the plowed field. There was no fire or explosion. He was awake per the ground helper who pulled him out and called 911. He spent 72 hours in the hospital due to a minor fracture to the sternum and minor fractures to the pelvic area.
