Empennage crushed
Left and Right wings damaged
All Prop Blades bent

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed ORD VFR (Columbia MS) (no services obtained) direct to MJD (Picayune MS) Climbed to 1500msl, about ten minutes into the flight the engine had sudden reduction in power. All gauges appeared normal, turned on electric fuel pump, no change, did try both prime and on position still no change. Did a mag check in air and did have a slight drop per side. Engine was running smoothly but had a different sound and didn't have enough power to maintain altitude. Tried to divert to 4R1 Lumberton MS but keep losing altitude. The terrain in the area was rolling hills and forest land. I picked a clear cut field that had a small road. Touched down on the road which had a turn to the right, while trying to make the turn, the plane basically ground looped (180) and then went backwards into a tree line.
