Memorandum for the Record
Accident Site Observations
CEN20LA127
Pleasant Prairie, Ohio
March 18, 2020

The airplane wreckage was found severely fragmented amidst a densely wooded area, which had an elevation of about 755 ft mean sea level (msl). The area surrounding the accident site was interspersed with agricultural fields, wooded areas, and scattered residential housing located adjacent to main roadways. The initial point of impact was a treetop. Impact marks were observed about 69-ft high in the tree. The airplane continued into the wooded area on an approximate heading of 135-degrees, impacted additional trees, and came to rest near a small pond. The engine, propeller, and main instrument panel were located about 55 ft away from the main wreckage.
