

RECORD OF CONVERSATION

Timothy N. Sorensen
Aviation Accident Investigator
Central Region

Date: March 29, 2020
Person Contacted: Eric Pratt, Mesquite Metro Airport Manager
NTSB Accident Number: CEN20LA134 – Mesquite, Texas

Narrative:

Mr. Pratt reported that fueling records revealed purchases associated with the accident airplane on March 7th, March 10th, and March 26th. Ten other aircraft were fueled from the self-serve system between the last fueling of N151JD on March 26th and the accident on March 29th. He has not received any comments regarding concerns about fuel quality at the airport. After the accident, samples were taken from the airport fuel tanks and truck. They were free of visible debris and contaminants.

Mr. Pratt's understanding was that the accident airplane owner/builder purchased fuel into portable containers. The airplane was subsequently fueled from those containers.
