NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On April 10th, 2020 my wife and I departed K1H0 (Creve Coeur) airport for KMLE (Millard, NE). Our VFR route was 1H0 – CABIT – MCM – TRX – KARMA – VIKKI – NE82 – 72NE – KMLE. The airplane was topped off with fuel just before the flight with a complete preflight. The airplane is a Beechcraft Bonanza N35 V-Tail with tail number N1258Z.

The flight was going very uneventfully and we found a smooth altitude at 4500 feet and were cruising at 155kts. We were 80 minutes into the flight and about 10 NM west of VIKKI at 4500 feet when the engine just immediately ceased to produce thrust. There was no warning, no cavitation or no engine instrument signs of problems. As soon as the engine stopped producing thrust I immediately went into action to restore power by first changing the fuel control lever from the right side to the left (right fuel tank showed ½), then turning on the fuel pump, I then brought the throttle to idle and then back up. I saw that the RPM gauge was still showing normal fluctuations but still no power. I was also looking for a field for us to land in and I tried to restart the engine, I got the warning sound from having the engine already running while trying to start it. At approximately 1500 feet I decided to avert my attention 100% to a field ditching. At this time both my wife and I could smell a slight burning smell. I have no idea where this smell was coming from, I assumed the engine. I saw several fields but the green grass filled field (only field not turned or tilled) I picked one that was close to a highway and looked somewhat flat. As it turns out, it was not flat at all and we are lucky to have walked away from this.

Our touch down was smooth but as we hit small hills and ruts in the field, the nose gear collapsed and the left main was jarred up into the left wing.
