Subject: FSD N44MX Cargo Information

I just got off the phone with the point of contact from the company listed on the cargo invoice. The flight was carrying 30 boxes of 10 completed circuit boards (10" x 12") from the manufacturing plant in Everett, WA for ventilators being constructed by GM in Indiana. He stated that the approximate weight of each board would have been 1-2 pounds, but is working now to get me an exact weight per box.
