Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The cowl, engine, tail section and nose landing gear separated from aircraft on impact with the ground. The plane came to rest upside down. The right wing separated from the fuselage. The left wing remained attached at the root, but outer portion of wing broke off. There was major fire damage to the cabin, appearing to be worse on the right side. There was fire damage to the right wing. Most of the propeller was also gone with damage to the spinner.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I planned for a flight departing KOUN South to the KADM area and return to KOUN.

I have no memory from 1 hour before the flight until 4 hours after the accident. The following timeline of events has been reconciled from information I was able to collect:

I departed KOUN at approximately 1130 hours on July 6, 2020. ADS-B information from Flight Aware shows me departing the area at 1138 hours at 1,700 feet. Then heading South, climbing up to 4,500 feet before turning back to the North at 1158 hours at 4,400 feet descending at 500 fpm. The descent continued while turning to the East then Southeast. The last information was at 1205 hours at 1,700 feet on a 143 degree heading at 96kts with a Latitude 34.26, Longitude -97.26 position. It appeared from the crash site that the plane made a 200 foot glide slope through a corn field in a Northwest heading. The plane appeared to impact the ground losing the nose gear, cowl, engine, and tail. The plane then appeared to roll to the left and land inverted. I suspect that I was able to exit the cabin through the right forward window before the cabin was engulfed with flames. I was informed that I was outside the plane when the paramedics and Fire Rescue arrived. I was transported by Pauls Valley EMS to Norman Regional Hospital in Norman, OK. I arrived at the Emergency department around 1300 hours and transferred to the Intensive Care Unit at 1439 hours. At this time, I still have no recall of the events from 1000-1500 hours on July 6, 2020.
