

NTSB RECORD OF CONVERSATION

Investigator name: Shaun Williams
Title: Senior Aviation Accident Investigator
Region: Central

Date: 10 July, 2020
Person Contacted: Colton Adcock
NTSB Accident Number: CEN20LA271

Narrative:

On July 10, 2020, about 0940 central daylight time, a Cessna T188, N2690J, sustained substantial damage when it was involved in an accident near Destin, Oklahoma. Mr. Adcock was a company pilot and a witness of the accident.

Mr. Adcock stated that the airplane was loaded with about 165 gallons of pre-emergent weed control and the tanks had been topped off (52 gallons) prior to the previous flight. He estimated the weight of the chemical to be about the same as water (8 lbs per gallon) since it was a mixed solution.

When the pilot began the takeoff roll, Mr. Adcock was unable to determine if the full length of the runway was utilized, but stated that the airplane did not "get off the ground when he should have." He then witnessed the airplane impact a power pole.
