Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 2Jul2020 I Will Sutherland was piloting a Robinson R44 N7511D. I flew 7511D at the welsh airport 6R1 for about 20 to 25 minutes. During this time I was performing a tank flush out. I was flying and spraying water out of my tank in preparation for an upcoming job. I finished the tank flush and landed, and told Dusty Walker. That I was finished and was going to fly the helicopter to his farm so we could wash, and clean the helicopter. Around 10:00am that morning I left 6R1 for an approximately 5 mile flight to Dustys farm. During the flight to Dustys I experienced a loss in power. Not a total loss in power just losing power. The low RPM rotor horn came on alerting me to the issue. I immediately lowered the collective and rolled power on. It had little or no effect to the issue at hand. I immediately made the decision to land the helicopter immediately. During my descent I was unable to get the low rotor RPM horn to go off. I estimate that I was 3-5 feet off the ground when I suddenly started spinning to the right. I immediately applied left pedal, but the spin continued. I then rolled throttle off into the detent but the spin continued. I'm real sure how many spins I made. Next thing I know I everything stopped and the helicopter came to rest laying on its left side.

Thanks

Will Sutherland
