NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended

Approximately 6:55PM on August 6, 2020, Jonesboro Airport (F88)
Preflight completed on what was to be a local flight.

After a normal runup and takeoff on runway 18, I circled back and overflew runway 36. While departing the traffic pattern to the north at approximately 800 – 1000 ft. msl, made a right turn out to the east.

Leveling out of the turn there was a LOUD POP and the engine immediately quit.

At that point I made another right turn towards the airport. Realizing the airport could not be reached and there were no viable openings for an off airport landing available, I slowed the plane to just above stall speed until mushy. Hitting the trees was inevitable so I tried to place the left wing into a tree which spun the plane around stopping forward momentum and then dropped to the ground upright.
