

RECORD OF CONVERSATION

Timothy N. Sorensen
Aviation Accident Investigator
Central Region

Date: August 5, 2020
Person Contacted: Greg and Jeanie Wallis
NTSB Accident Number: CEN20LA322 – Jonesboro, Louisiana

Narrative:

Mr. and Mrs. Wallis were at home on their porch when they heard the airplane fly over toward the north. Initially, the airplane appeared to be in straight and level flight, and nothing seemed to be out of the ordinary. They live near the airport and are accustomed to hearing airplanes in the area.

Shortly afterward, they heard the engine “backfire” and then it seemed to quit running. They subsequently observed the airplane in a right turn, apparently attempting to return to the airport. The airplane entered a glide and descended below the tree line.
