Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Left Gear + Tailwheel broke, both wing sustained damage, prop strike, fuselage tubing bent, Rudder damage, ailerons and flaps damaged

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

on the morning of 8-20-2020

AT approximately 8:15am I departed MS21 to make a spray run. AT approximately 9:00 AM central Time I was on approach to landing back at MS21 in an Airtractor 602. I pulled my power lever back to start slowing down and configuring the aircraft for landing. I started putting my flaps down and as my airspeed decreased, I grabbed my power lever to add power to ensure I would make the runway. The power lever was stuck in the idle position and would not budge. Everything was happening fast and I continued to try and get the power lever to move. Once I knew the aircraft would not make the field and I was going to make a forced landing into a bean field I pulled my prop to feather to reduce prop drag and increase my glide. as the aircraft settled into the beans I tried to hold the nose up to keep from flipping over on its back. The right gear touched in the beans first and pulled the plane down and spun it around backwards, as the aircraft went around it got the prop, wings, left gear come out from under it and the tail wheel, it also bent fuselage tubing near the tail.

RECOMMENDATION (How could this accident/incident have been prevented?)
