Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Top and bottom wing damage, engine damage, propellor damage, tail damage

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The aircraft had been seeding crops the day of the incident, with multiple trips taken from KOGA to the nearby field without any abnormal indications. The oil level was checked that morning before the flight and the gas was filled to approximately 60 gallons between each load. The pilot took off from KOGA runway 26 around 3:50pm MDT and the engine lost power shortly afterwards during the climb to ferrying altitude. The pilot dumped the load of rye seed he was carrying to make the plane lighter in hopes of reaching a favorable emergency landing site. The pilot quickly checked the magnetos and made sure the fuel was on, neither which were the cause, and was forced to make an emergency landing in a corn field approximately 1.85 miles from the airport. The surrounding terrain was flat. Upon landing, the bottom wing hit the corn which flipped the plane upside down. The pilot was uninjured during the crash and was wearing a 4-point harness and helmet.
