Subject: Helicopter crash

Good morning Clive,
Here is my statement from what I saw a couple weeks ago with the helicopter crash.

I was driving along Rt 3 and I notice that the helicopter appeared to be either taking off or landing. It looked like it was only 6-8ft from the ground to the landing pad. I had my kids in the car and my youngest didn't see the helicopter when we drove past so I turned onto Huntfield Rd so he could see it. We were only stopped watching it for maybe 20 seconds and that when the helicopter started spinning out of control. At first I couldn't believe my eyes and then realized this was going to turn bad very quickly. It was spinning and going up and down and then it just came straight down colliding into the storage shed as well. By the time I drove through the parking lot of the funeral home and parking the bank which is right next to where the accident happened, I parked and got out of my vehicle and started running towards the helicopter that was smoking horribly. When I got the the other side of the bank building the helicopter blew up into flames. All I could do after that was to call 911.

If you need anything else please let me know.

Thanks
Michelle Cowell
