Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Prop strike, loss of right landing structure, right wing tip contacted runway

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We had recently taken delivery on restored N88204 and I had been meaning to build time in the aircraft. Of my 259 landings in Cubs, I had just 14 in 88204 and was looking to add another 40 before I would take a passenger. Sunday evening 8/30 was looking to be a great evening to build time - light winds out of the east. Hartford (KHFX) had been closed during much of the 2019 flying season as new grass and pavement strips had been installed. I had used the grass runway 18/36 only during my summer flying this year. I contacted my flight instructor several hours before the flight to get confirmation on the new 09/27 grass runways though I had a pretty good idea where it was due to my use of the new paved 09/27 runway which I had used on occasion during this summer. My flight instructor emailed a map of the airport with a blue marker indicating the new grass runway 09/27. It confirmed exactly in my mind the location of the runway. The visual was such a strong confirmation that unfortunately I didn't read carefully the rest of his text message. My plan was to do a fly over the runway due to never having landed on it before. I departed Westbend at 1715 and entered the downwind for landing on runway 09/27 at Hartford at about 1730. Upon turning on final I saw a massive grass space before me and as I reached the runway I thought, "Why waste the landing opportunity and fly over, this is a massive space surely it's the runway." I executed a landing I was quite pleased with and came to a near stop. Unlike the Cubs used for my training, 88204 has tundra tires and I wanted to spend some time on the runway doing some fast taxiing to become better acquainted with the difference in handling. Unfortunately I struck a runway marker in the process - I was of course shocked as I was proceeding right down the middle of the runway. I was very disappointed to discover that the airport map that I looked at prior to the was a visual looking west, as if I were to be on approach to runway 27, not east, approaching runway 9. Thus the new 09/27 runway was on the north of the paved 09/27, NOT on the south where I had landed. This smaller south section is permitted to be used as a landing area it's just not 2,000 feet long which I wrongly assumed I had to work with while doing the taxiing maneuver. There is no blame to be placed here other than on my shoulders. Had I read the correspondence carefully and not relied solely on the visual given to me, the situation would have been avoided.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

As stated above, I just needed to spend an extra few minutes and read entirely what had been sent to me. The visual was such strong confirmation of my preconceived idea of where the runway was I didn't bother to look further. Also, my PLAN was to do a flyover. That decision was made in the quiet of my car driving to the airport. My flight instructor confirmed it was a "GOOD" plan. Once again the visual of the massive green space and the desire to put the plane on the ground on what was a beautiful approach contributed to the abandonment of a good preflight plan. This too was a mistake.
