

Dave Paladino Training Record

After several meetings with Dave to discuss his Cirrus partnership and embark training we officially began on the SR22 Cirrus Transition Ground Lesson on January 11 2021. We completed all the required ground and flight lessons on February 3. We then continued his flight training to meet additional insurance requirements, high performance endorsement requirements, and proficiency standards which were completed March 28th after logging approx 23 hours dual. Although the Cirrus can be overwhelming at first with the advanced avionics and performance characteristics, Dave took it as a challenge. From a CFI standpoint Dave was very easy to get along with because of his humble approach and hunger to keep learning about aviation and enhancing his pilot skills.
