

Ozarka College

Office of the President

Memorandum

August 11, 2021

From: Dr. Richard L. Dawe, President, Ozarka College

To: NTSB – Mr. Alex Lemishko

Mr. Lemishko, based on your recommendation to install radio transmission recording capability on the unicom frequency (122.9) at Melbourne Arkansas (42A); I am pleased to report that Ozarka College has established the capability the same day you made the recommendation. Ozarka College operates an FAA Part 141 collegiate flight training operation at the Melbourne airport and is the most active tenant at the airport.

I thank you for the recommended action that will immediately lead to enhanced safety of our operations.

Respectfully submitted,

R.L. Dawe, Ph.D.
