I was driving up Hwy 65 just past Ward creek saw shadow of plane and then it crashed right in front of me. Stop truck pulled passengers as far as I could away from plane and then people started to help move them. I went to my cabin to call 911. It had already been reported

We was fishing and saw the plane lowering into the trees and heard a big impact boom. Ran to the top of the hill and walked up to the scene and other drivers had already pulled the 2 people out of the plane and had them on the side of the road. Stayed and helped with what we could get to plane's water back tape.

As I came around the corner on the highway I saw the Aircraft on the ground. The pilot and passenger were on the ground next to the fuselage. I assisted other people in dragging the pilot and passenger approximately 100 feet away from the wreckage. Approximately five minutes later the aircraft burst into flames. The pilot stated that he had engine problems and when I asked said he had 60 gallons of fuel left in the plane. That prompted us to move him another 50 feet away in case of explosion we provided comfort and basic first aid until EMT arrived.
