Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Rotor blades, tail rotor gear box, right front windshield, body part damage.
No other property damage

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 10/18/2020 at 2pm I was departing the tie down area and moving up the slight incline to my takeoff area without noticing I was coming too close to the ground. As I prepared to announce my departure, a wind gust weather vaned me causing the helicopter to turn and lower enough to strike the ground starting the rolling action. Even though I know to lower the collective in that situation, my immediate reaction was to pull up exacerbating the problem. The helicopter picked up and rolled onto its side. I shut off the fuel mixture, master switch, and fuel shut off before exiting the aircraft.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Hover at 4-5 feet off the ground

Lower collective on impact
