NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On October 26, 2020 undersigned and my student, mr William (Bill) Unger, took off from the Tiki Bar & Grill private grass strip in a Piper Cherokee 140 with tailnumber N32458 operated by Coastal Skies Aero Club which is located at Pearland Regional Airport (KLVJ). Prior to the flight the W&B and take-off distance have been verified and turned out to be suitable for the flight. I also made my usual phone call to the Tikibar to verify the status of the runway which was confirmed dry and recently used by other general aviation aircrafts. Mr Unger taxied back all the way down to the very north end of the runway where we completed the runup and set for a southbound departure. We departed with soft-field settings and about 12 knots headwind. Mr Unger had control over the airplane during this part of the take-off and put the airplane in ground effect and nosed down to a normal angle of attack, gained speed before rotating at approximately 80 knots. A climb occurred followed by a drop in RPM. My first reaction was checking the throttle control but it was set to full power but with no significant engine performance. At that realization I took the control of the aircraft pushed the nose down and started steering it away from the highway and powerlines, to the right aiming for the northside field parallel to highway 87 which seem to have little to no obstructions other than tall grass and bushes. Due to the lack of performance I was forced to land before I could fully complete the approximately 90-degree turn. The wheels touched down on the field at the northside of the highway but the airplane became uncontrollable immediately after touchdown. After the airplane came to a stop both, mr Unger and myself, confirmed not to be injured. Mr Unger turned the fuel selector into the off position, we killed all the switches and the ignition and opened the door to evacuate the aircraft. We distance ourself from the airplane and I called 911 to report the accident.
