STATEMENT OF FACTS

On 8 November 2020 at approximately 1330 hours, I departed with full fuel tanks from LHQ in my airplane N33DW. My intention was to do some pattern work; some practice maneuvers and several instrument approaches. After working a short time in the local area, I decided to fly to CYO where I intended to fly the RNAV 01 approach, with a hold on Rajah; followed by the VOR 19 approach with a hold oh XUB and after practicing tracking off XUB. Finally, I intended to return to LHQ and fly the RNAV 10 then park the plane.

I flew to CYO and I entered the hold on RAJAH for the RNAV 01. I completed the hold at Rajah and then flew the full approach to a landing without incident. I then powered up and took off from CYO to set up for the VOR 19 approach. I accelerated down the runway and lifted off without any issue. The plane accelerated down the runway normally and commenced its climb at a normal rate. As I approached the departure end of the runway I retracted the flaps.

At approximately 1430, I had just retracted the flaps when the engine ceased producing any power. I heard no engine noise. Needless to say, at only a few hundred feet AGL, this was an eerie event that intensely focused my attention. I immediately checked the fuel pump switch; the mixture and I switched from the right main tank to the other full left main tank. When there was no response, no engine power or indication of the engine running; I immediately turned into the wind, slightly to my right. I chose a spot to land. I made an off field landing.

My first reaction upon landing was that the event was far less dramatic than I anticipated. The plane rolled for a short distance before it suddenly and violently nosed over. I infer that during the roll out the nose gear collapsed bringing the forward momentum to an abrupt halt. This was a jarring end to what I had believed was a successful off field landing.

As soon as the plane stopped, I looked out the window and saw a farmer, or farm worker, getting out of a truck. I jumped out of the plane to apologize for landing in the field and approached the farm worker. I called 911. Cell service must have been poor as I dialed 911 at least 5 times before it connected. The worker and I spoke until the Pickaway County Sheriff deputies arrived with EMS and fire department personnel. While we spoke I looked over the plane. I was initially noticed what at first glance appeared to be only a collapsed nose gear.

The Sheriff Deputy spoke to me as did some EMS personnel. The fire department left as soon as it was apparent there had been no fire and there would be no fire. I believe someone asked me if I had shut off the fuel and I believe I climbed into the cockpit to assure the fuel switch was turned off. The deputies notified me that the Ohio Highway Patrol was called to make a report so we stood by the plane chatting until the OSP personnel arrived.

OSP personnel gathered information and called a representative of the FAA (Dennis Garcia) and a female NTSB employee. We all spoke on the phone. The FAA and NTSB personnel asked the OSP personnel to take photos and to make a report.

I then interacted with the OSP personnel and provided them with all the information requested until they informed me I could leave. I contacted a friend who resides in Orient, Ohio. He sent his sons to drive me back to LHQ where my automobile was parked. The OSP supervisor advised me to lock the plane to avoid theft of any avionics. I did as instructed and departed for home.
