Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to right outboard wing. Engine/Prop damage, Firewall Damage, Right Main landing gear damage. Tailwheel gear damage, Fuselage Damage. No Damage to Property

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

While visiting family, I landed at JHN and fueled aircraft and cleaned windshield. I then taxi'd to runway 17 and then departed the area to the east and saw a family member working in the field. I decided to perform a flyby from the North to the South, I then began making a low level left turn to the East over a field which was soft and beginning to sprout when I felt the left wing began to drop toward the ground, I immediately imputed full right aileron at which point the left wing began dragging on the ground, followed by the engine/propeller impacting the ground and then the aircraft continued rotating left at which point the right main landing gear separated the aircraft and the outboard right wing impacted ground. The aircraft then continued sliding to a stop. The airplane remained intact except for the right main landing gear. The pilot and passenger exited the airplane through the doors. The weather was nice with excellent visibility. The wind was blowing from the south and gusting to 25kts.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

While flying, maintain a safe altitude and attitude. I would recommend to be safety conscious and not allow yourself to be put in a position that you could hurt yourself or any passengers let alone the airplane. I hope people will take away from my experience that it is not worth the risk of "show boating". As comfortable in your abilities as you may feel, a mistake can happen faster than you will know. If I was at a higher altitude, this would not have happened.
