Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

propeller, cowlings, engine, wings, flaps, canopy, horizontal stabilizer, elevators, vertical stabilizer, rudder, landing gear,

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed KSWI at about 1440hrs. I arrived t 15TX at about 1500hrs. I performed 3 approaches to runway 18 then on my final approach I determined that I was going to touch down a little long so I initiated a go around at about 30' agl. The engine initially went to full power but after 3 seconds it rapidly rolled back to idle. This forced me to discontinue the go around and land with insufficient runway remaining to get the aircraft stopped. With about 150' of runway remaining, I steered the aircraft to the left and when it departed the prepared surface the wheels dug in and the aircraft nosed over coming to rest inverted.

Runway 18 has trees at the departure end.
