Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Full extent of damage unknown. Hard landing inspection and fuselage belly composite evaluation needed. Nose wheel separated from aircraft and recovered by airport personnel, minor damage to nose wheel fork and steering stop plate is missing. NLG strut damaged beyond repair. Damage to bottom of firewall, extent unknown. Damage to fuselage belly composite in/around NLG strut attach box, extent unknown. Composite fuselage and firewall have disbanded from each other. No damage to propeller or engine.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Event of Sunday Feb 21, 2021, Indianapolis International Airport/Indianapolis Metro Airport
Event of Feb 21, 2021

Day started at 845am local at SMD; rental airplane from Sweet Aviation-aircraft Diamond DA20, Tail number N465US.

Plan was for a brief training stop at IND then to UMP for a shopping trip in the area with return to SMD. Pilot David Sofair, Fort Wayne, Indiana and passenger spouse Audrey Sofair, Fort Wayne, Indiana aboard.

Preflight was completed with no abnormalities noted, just barely adequate oil was seen; fuel was filled and 1 quart oil added. Taxi to runway 13 from the run-up area; my wife commented that something sounded funny underneath the plane. I attributed the sound to the packed snow on the runway. Takeoff on runway 13 SMD at approximately 0925am local time) was uneventful and then flying left traffic the northeast. FWA approach was contacted for flight following to KIND, with eventual hand-off to Grissom approach then Indianapolis Approach. Assigned runway 23R, information Whiskey. Cleared for the option and landed 23R. First touchdown mains then nose with a bounce, then touch and go. Added power and take-off flaps. Vague recall of the nose jumping up slightly during the climb (was this the wheel coming off?) This was approximately 1045am.

Turned to the north and vectored by Indianapolis departure to the north and northeast. Out of Charlie airspace and switch to advisory approved.

Looped around UMP to the north and then east to join left downwind for Runway 15. There were two (or possibly a third) GA aircraft in the pattern at the time. Landing was made on runway 15 near the numbers, first mains then nose. This was approximately 1110 am local.

When nose touched there was a very significant scraping noise. Since we were moving on the rollout, I did not suspect that the nose gear was missing but recognized that there was a significant problem likely underneath the plane. The plane slowed and when near a complete stop it violently bounced up then down (or possibly down then up). That instant was quite surprising because the plane was nearly stopped. I initially attributed that violent motion to a prop strike. In retrospect I think that the plane may have stopped abruptly with the tail jumping upwards and then dropping down-but the prop did not strike. I shut off the engine. On CTAF frequency I alerted Metro traffic that my aircraft was immobile on Runway 15. I think I made that call twice. I then called Unicom to alert them that the plane was immobile on the runway and a tow vehicle was sent out. The electrical systems were shut off, fuel was shut off.

While waiting for the tow I telephoned Sweet aviation to notify them of the incident. When the tow arrived we got out of the plane and I saw that the nose gear strut was in place but the nose wheel was missing. The propeller did not appear damaged. At this time (1123 am local) I phoned Indianapolis approach to alert them that there might be nose gear on Runway 23R. The plane was towed to the hangars. A taxi was called and we left UMP by taxi and rented a car at IND which was later dropped off at FWA. There were no bodily injuries.
