Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Micheal E Erwin
Pilot of N902LP
Livingsgton Parish Sheriffs Office

On 2-22-21, I was contacted by the St. Helena Sheriffs Office to assist with a search for a missing person around the Greensburg, La area. The St. Helena Sheriff's requested that I fly to the hospital in Greensburg, La and pick up a deputy who was familiar with the search area. I met Dy. M Fiske at our hangar 50LS and we agreed that since he was a new pilot that I would fly the left seat and he the right. I advised Dy. Fiske that I would fly the misson and he could fly to and from as St. Helena (Greensburg) was about 20 mins away. I landed at the hospital and picked up Deputy Joe Chaney and departed to the search area without incident. After flying the area for several minutes, Dy. Chaney did not recognize the exact area we were suppose to search. I observed a large pasture nearby and told him to start trying to text or call ground units to get an address of where we should be. I would then put it in the GPS and fly direct to it. I landed in the pasture without incident. We were on the ground for approximately 10mins and the helicopter was at ground idle. After I got the address and entered it into the GPS system, I rolled the throttle to 100%. I observed that all guages and systems were normal and that we had just over 400lbs of fuel. I then looked left and right and cleared the area. I brought the helicopter to what I believed to be about a 2-3 foot hover and it rolled hard to the right and rear. I attempted to stop the roll by bringing the collective full down and applying full left cyclic but was unable to avoid the rotor system hitting the ground. I then rolled the throttle off as the helicopter rolled on its right side. After the impact, I checked on both people on board then turned off the fuel and all other power. We exited the helicopter through the left pilot door. Emergency personel arrived very soon after.

The onboard gps reported the wind from 7-14 from the north north west, the weather was clear and the visibility unlimted. I landed and attempted to takeoff to the north northwest.

The debris feild was contained to a small area around the helicopter. The helicopter was destroyed. There were minor injuries

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

After looking at the scene it appears as though the right rear skid contacted the ground while i was hovering which caused a dynamic rollover condition. I should have ensured a proper hover altitude with no lateral movement.
