NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Full flight was VFR no weather issues.

Departed Colorado Spring from KFLY at about 7:40AM (Mountain Time) to KPUB to pick up passenger at about 8:30AM (Mountain Time). Departed KPUB about 9AM (Mountain Time) and next destination was KRPB for fuel and bathroom break. Arrived at KRPB at about 2PM (Central Time) and departed about 2:30PM (Central Time) to final Destination. Arrived at Final Destination about 4PM (Central Time) and proceeded to do several passes on a private grass field (Off Airport) to assess landing safely. After my third pass I had decided on what seem to be very stable and relatively flat surface. I committed to the landing and and setup for a slow and stable STOL approach, at touchdown air speed was about 30-35MPH and touched down, just seconds after touchdown we hit something hard that launched as back into the air about 5-10 feet and abruptly hit nose first and rolled forward ending upside down. We safely exited the plane and got clear. After settling down for a few minutes and making sure all passengers and myself were safe. I realized that we had hit a berm that was covered in grass and could not see the contour from the air. I never saw the berm even at touchdown or roll-out. The berm collapsed the front landing gear and caused us to nose into the ground and flip.

RECOMMENDATION (How could this accident/incident have been prevented?)
