Mr. Fox,
Here is what I received. I don't see any contamination.

From - Bill Pooler [wrpooler](#) [REDACTED]
Here are the photos of the fuel samples that I took from the truck that fueled N421PB on 4/9/2021. I can't see any sign of contamination.
I have included a photo of the mila pore test disc I ran as I took the samples.
Bill Pooler line lead Kaw Valley Aviation.

Please let me know if you need anything.

Importance: High

Mr. Orpin,

Did you ever receive photographs of the 3 fuel samples that were quarantined from the Kaw Valley Aviation fuel truck following the accident?

Please advise when able.

Sincerely,
Andrew Todd Fox
NTSB, Air Safety Investigator

Mr. Orpin,

I do not believe the fuel truck needs to be quarantined... please have them take photos of the three samples and email them to you and/or me.

Also, until we can get Eurocopter and Turbomeca to examine the fuel system on the airplane/engine (Wed/Thu), I would prefer that the 3 fuel samples remain intact and quarantined.

Sincerely,
Andrew Todd Fox
NTSB, Air Safety Investigator

Hello Mr. Fox,

It is buried in the email string below but on Friday I asked Bill Pooler - cell [REDACTED] of Kaw Valley Aviation to secure the fuel truck that provided the fuel to N421PB prior to the accident flight and to take three fuel samples in glass jars.

Do we still want him to keep the truck secured or is he free to start using it? No one is asking about it, I was just looking through my notes, remembered it, and thought I'd check.

It's an accident. I'll assign this to an investigator.
